

Revision and Repair Operations

- Accessory inspection
- Auto-centering check
- Distance measurement check
- EDM optical fiber alignment and check
- EDM signal alignment and check
- Tracking system check
- Angular reading check
- Tribrach stability check (base plate)
- Tilt axis correction and check
- Angle calibration
- Compensator calibration
- Level vial calibration
- Plumb calibration
- Reticle calibration
- Data communication verification
- Focus verification
- Axis orthogonality verification
- Servomotor verification
